

Teaching Analogy Phonics

Developed by Marn Frank
Literacy & STAR Coordinator
mfrank06@hamline.edu
Updated September 2016

This project was contracted and funded by Adult Basic Education Teaching and Learning Advancement System (ATLAS). Housed at Hamline University's School of Education, ATLAS is made possible with a grant from the Minnesota Department of Education using federal funding, CFDA 84.002, and/or Minnesota Statute Section 124D.522.

Teaching Phonics to Children and Adults

There are three evidence-based or proven approaches for teaching English letter-sound patterns or phonics to children and adults. All are sequential, systematic, and use explicit instruction. All can be delivered in short, regular lessons that combine seeing, hearing, saying, reading, and spelling activities. Below are brief descriptions of each.

- **Synthetic** (meaning combining different substances or components) teaches individual letter-sound patterns, blending, and segmenting of recognizable words. For example, a teacher shows and says the **consonants m, l, s, t** and **short vowel a**. Students practice saying the sounds and the teacher models how to blend (or combine) them into small words: **am, Sam, tam, Al, Sal, as, mat, at, sat**. Then he/she guides them in rereading and spelling the same words.
- **Analytic** (meaning separating something into components or parts) teaches analysis of letter-sound patterns in known words and application to unknown words. For example, a teacher explains **short vowel a** and **long vowel a, silent e** headers, which include phonetic spellings, example words, and sometimes pictures. He/she models how to sort (or separate) by headers a list 12-21 other words: **mad, fast, page, name, same, hand, snap, came, grass, rake, made**. Then he/she guides students in rereading, resorting, and spelling the same words.
- **Analogy** (meaning comparing things based on their similarities) teaches phonograms (or rimes) and their related word families (formed by adding onsets or consonant patterns at the front). For example, a teacher shows and says the phonogram **-ab**. He/she models how to add the single consonants **c, d, g, j, l, n, t** at the front to form relatives: **cab, dab, gab, jab, lab, nab, tab**. Then he/she guides students in rereading and spelling the word family.

Synthetic is the most common phonics approach and used in many published instructional materials. Analytic may be challenging for new readers with limited literacy experience or long-term reading difficulties, but can be a fun and interactive practice activity. Analogy teaches predictable, reliable, and decodable "chunks", which can be generalized to many other one- and multi-syllable words.

The developer considers analogy phonics to have great potential for ABE and ESL beginning readers - if basic oral language and Roman alphabet skills are present. Therefore, this resource provides ABE and ESL reading teachers and tutors with convincing background information and testimonials, a lesson plan model and template, other reinforcement ideas, and many common or sequential phonogram and word family lists for immediate analogy phonics instruction.

How do history and research support analogy phonics?

Analogy phonics has a long history in American reading instruction. In fact, it dates back to the 1600s, 1700s, 1800s, and one-room schoolhouses! It has been successful across centuries because many new readers (children and adults) find it psychologically easier to divide words into onsets and rimes rather than individual letters and sounds. This may be explained by current brain research, which suggests that our brains are more natural “pattern detectors” than “rule applicers”. In other words, if the brain has a store of learned phonograms and related word families, it will automatically search that storage and detect familiar patterns when encountering unfamiliar words. This cognitive process of pattern detection and pattern application is often more effective and efficient for new readers. It is also known to improve aspects of reading and writing fluency (accuracy and rate)!

What are the most common phonograms?

In 1970, Wylie and Durrell identified 37 high-frequency phonograms that can be found in over 500 words commonly found in lower-level texts. In vowel (a, e, i, o, u) order, they are:

-ack, -ail, -ain, -ake, -ale, -ame, -an, -ank, -ap, -ash, -at, -ate, -aw, -ay
-eat, -ell, -est
-ice, -ick, -ide, -ight, -ill, -in, -ine, -ing, -ink, -ip, -it
-ock, -oke, -op, -ore, -ot
-uck, -ug, -ump, -unk

Has analogy phonics been successful in ABE/ESL classrooms?

Between January and April of 2015, a small group of MN ABE/ESL reading teachers piloted analogy phonics in their classrooms. Below are excerpts from their inspiring testimonials:

- “My students have had strokes...One student rarely expresses emotion and her language is limited. We had completed a bingo activity, where they filled in a blank card with the word families we studied. At the end of the lesson, she said: Boy that was FUN!” (Lori Leininger)
- “I introduced two new word families a week and was encouraged to see students become more intentional in their pronunciation...” (Erin Evans)
- “We have been working with word families as part of our weekly story. The word earthquake came up in passing. After we talked about what it means, I realized that we worked with -ake recently. The students remembered and recognized the word family. It was a really neat ‘pieces coming together’ moment.” (Ellie Purdy)

What does analogy phonics look like?

Pages 6-7 outline a lesson plan model for reviewing *-ay* and teaching *-ill*. Each explicit step (see below) takes between 5-15 minutes, so it actually covers several days to a week of analogy phonics instruction and application to text. It is duplicable for all other phonograms.

1. Teacher **explanation** of analogy phonics purpose and process (as needed)
2. Teacher-student **drill** (or review) of taught phonograms and word families
3. Teacher **modeling** and student **guided practice** with a new phonogram and related one-syllable words
4. Teacher **modeling** and student **guided practice** with related multi-syllable words (optional)
5. Student **application** and teacher **monitoring** with echo, choral, or collaborative oral readings of connected text: phrases, sentences, paragraphs, passages, etc.

Page 8 presents a 'fill-in-the-blank' lesson plan for daily or weekly analogy phonics instruction and application to text.

Pages 9-12 provide other phonogram reinforcement activities used by one or more members of the MN ABE/ESL pilot reading teacher team:

- Erin Evans, IEC
- Emily Fisher, Central MN
- Kristin Klas, HAP
- Lori Leininger, PANDA
- Kristin Perry, HAP
- Eleanor Purdy, MLC

Which phonograms should I teach?

Pages 13-17 provide 37 high-frequency phonograms and word families in rank or frequency (not vowel) order (Fry, 2006). Each word family scaffolds from single consonant onsets to digraphs and blends. If you have limited time for analogy phonics, teach these phonograms and word "relatives". They are in larger font with room to add more words.

Pages 18-90 provide over 100 phonograms and word families organized by increasing complexity and alphabetical order: short vowels with single, blend, digraph, and trigraph consonants; then long vowel silent-e, long vowel digraph, r-controlled, diphthongs, and irregulars with all consonants. If you have regular time for analogy phonics, teach most of these phonograms, but carefully select word relatives your students should know. They are also in larger font with room to add more words.

Note: Several of the ESL pilot reading teachers, who use a core language curriculum or themed stories, taught 1-2 phonograms present within the curriculum or story per week. Although their phonogram selections may have been "out of sequence", this provided a relevant and workable balance of language and literacy instruction.

Sample Analogy Phonics Lesson Plan Model (-ay and -ill)

Step 1: Explain Purpose and Process (as needed)

"I am going to teach you English phonograms. Learning phonograms will help you read and spell more words. I will begin by showing you a simple pattern. Then we will add other letters to make words you should know. All of the words will sound the same at the end or rhyme. This will help you remember the pattern. Together, the pattern and other words are called a word family. We will read and spell word families many times. Then we will be able to read them in phrases, sentences, paragraphs, or stories."

Step 2: Drill (or Review) Taught Phonograms and Word Families (5 minutes)

- Visual: Teacher shows and reads a list of taught -ay words: bay, day, gay, hay, Jay, lay, may, pay, ray, say, way (and if appropriate: quay, clay, slay, bray, fray, gray, pray, stay, tray, sway, spray, stray). Students reread the words.
- Auditory: Teacher erases the list, dictates the same (or some) of the words, and students orally spell or air write them together. Immediate correction is provided.

Step 3: Model and Guide New Phonogram and Word Family (10-15 minutes)

1. Teacher shows and blends the new phonogram: $i + ll = ill$
2. Teacher shows and blends a set of -ill words with single consonant onsets: bill, dill, fill, hill, gill, Jill, kill, mill, pill, quill, sill, till, will.
3. Students reread -ill and the word family as the teacher underlines -ill in each word.
4. Teacher quickly defines unknown words or gives simple contexts: "Fish use gills to breathe in water. A till, like in a cash register, stores money."
5. If appropriate, teacher shows and blends another set of -ill words with consonant digraph or blend onsets: chill, drill, grill, frill, trill, skill, spill, still, twill, shrill, thrill.
6. Teacher quickly defines unknown words or gives simple contexts: "A chill is when you feel cold. A frill, like lace or ribbon, can be added to clothing."
7. Students reread the other relatives as the teacher underlines -ill in each word.
8. Teacher dictates some of the taught -ill words and students spell on paper. Immediate correction is provided.

Step 4: Model and Guide More Complex Word “Relatives” (optional)

If appropriate, teacher shows and blends more complex sets of *-ill* words with *-s/es*, *-ing*, *-ed* endings, as compounds, or with common suffixes and prefixes.

bills fills hills gills kills mills pills sills fills wills drills grills
billing filling killing willing drilling grilling spilling thrilling
billed filled killed milled drilled grilled spilled shrilled thrilled
landfill downhill uphill hillside pillbox windowsill millpond goodwill
biller filler killer miller driller griller spiller shriller thriller
billion million trillion refill unskilled unwilling stillness silly chilly

Step 5: Apply New Word Family to Text and Monitor Progress (10-15 minutes)

1. If needed, the teacher shows and says a set of sight or high frequency words: has, a, he, take, the, on, it, look, for, works, at, she, has, lots, of. *
2. Students practice rereading sight or high frequency words.
3. Teacher models reading phrases or sentences with *-ill* and sight or high frequency words:

Bill has a chill. The cat sat on the sill. Jill works at the mill.
He will take a pill. It will look for birds. She has a lot of skills.

4. Students echo or chorally read the phrases or sentences.
5. Teacher and students write and read other sentences using *-ill* words.
6. Teacher and students collaboratively read aloud published text at easy or beginning levels. **
7. Teacher and students list all or some words from the text that are related to known phonograms.
8. Teacher informally checks comprehension of the text by asking a few 6W questions (Who, What, When, Where, Why, and How).

Analogy Phonics Lesson Plan Template

Step 1: Explain Purpose and Process

Step 2: Drill Taught Phonograms and Word Families

Visual words:

Auditory words:

Step 3: Model and Guide New Phonogram and Word Family

New phonogram(s):

New simple words:

Step 4: Model and Guide More Complex Word “Relatives” (optional)

New complex words:

Step 5: Apply New Word Family to Text and Monitor Progress (10-15 minutes)

New sight or high-frequency words:

Phrases or sentences:

1. _____
2. _____
3. _____
4. _____
5. _____

Text for collaborative oral reading:

Other Ideas for Phonogram Reinforcement

Phonogram Bingo

Make copies of this 4 x 4 Bingo card. Students write one word in each box from 2-4 known word families. Teacher calls out words and students mark matching words. All students who cover three words down, across, or diagonally win!

Phonogram Bingo			
			FREE
		FREE	
	FREE		
FREE			

Phonogram Sorts

Use this page and the next to create two- or three-pattern phonogram sorts. Write taught phonograms in the shaded boxes and word relatives in the unshaded boxes. Students cut up the page, teacher models how to sort by headers, and students reread and resort alone or in pairs. Word sorts work especially well for similar looking or sounding patterns.

Phonogram Sort 2	

Phonogram Sort 3

Phonogram Find

Write up to eight taught phonograms in the shaded boxes. Students reread a passage, article, story, or even book chapter and write all found word "relatives" in the unshaded boxes. This activity increases excitement about phonograms because it reinforces their connection to accurate word recognition within text!

Phonograms	Word Family Relatives

Common Phonograms and Word Families in Rank or Frequency Order (no names)

Phonograms	Word Family Relatives
-ay	bay, day, hay, lay, may, pay, ray, say, play, stay
-ill	bill, fill, gill, hill, kill, mill, pill, sill, till, will, spill, still
-ip	dip, hip, lip, rip, sip, tip, zip, flip, drip, trip, slip
-at	bat, cat, fat, hat, mat, pat, rat, sat, flat, slat, spat
-am	am, dam, ham, jam, ram, tam, clam, slam, spam
-ag	bag, lag, nag, rag, sag, tag, wag, flag, drag, snag
-ack	back, hack, lack, pack, rack, sack, black, track

-ank	bank, rank, sank, tank, blank, drank, frank, thank
-ick	kick, lick, nick, pick, quick, sick, thick, click, stick
-ell	bell, cell, fell, sell, tell, well, yell, shell, smell, spell
-ot	cot, dot, got, hot, lot, not, pot, rot, shot, spot
-ing	king, ring, sing, wing, thing, bring, sting, swing, spring
-ap	cap, gap, lap, map, nap, rap, tap, clap, snap
-unk	bunk, dunk, hunk, junk, sunk, chunk, drunk, trunk
-ail	bail, fail, hail, jail, mail, nail, pail, rail, sail, tail, trail

-ain	gain, main, pain, rain, chain, brain, train, stain
-eed	deed, feed, need, seed, weed, bleed, greed, speed
-y	by, my, shy, why, fly, cry, dry, fry, try, sky, spy
-out	out, bout, pout, shout, scout, spout, trout, sprout
-ug	bug, dug, hug, jug, mug, rug, tug, drug, shrug
-op	cop, hop, mop, pop, sop, top, chop, drop, stop
-in	bin, fin, pin, sin, tin, win, shin, thin, skin, spin, twin
-an	ban, can, fan, man, pan, ran, than, plan, span

-est	best, nest, pest, rest, test, west, zest, chest, crest
-ink	link, pink, rink, sink, wink, think, blink, drink, shrink
-ow	low, row, show, blow, flow, grow, slow, snow, know
-ew	dew, few, new, chew, blew, brew, stew, knew
-ore	bore, core, more, sore, wore, chore, score, store
-ed	bed, fed, led, red, wed, bled, fled, sled, shred
-ab	cab, dab, lab, tab, flab, slab, crab, drab, grab
-ob	cob, job, mob, rob, sob, blob, slob, snob, knob

-ock	dock, lock, mock, rock, sock, shock, clock, knock
-ake	bake, cake, lake, make, quake, take, flake, brake
-ine	dine, fine, line, mine, nine, vine, shine, whine, shrine
-ight	light, might, night, right, sight, tight, flight, plight
-im	dim, him, rim, slim, brim, grim, trim, skim, slim, swim
-uck	buck, duck, luck, muck, suck, tuck, pluck, stuck
-um	bum, gum, hum, sum, glum, slum, drum, strum

Other FREE, ATLAS-Sponsored Resources

Beginning Alphabetic Tests and Tools (BATT) is available to view or print at <http://atlasabe.org/resources/ebri/ebri-alphabetic>. It provides a 'principled' system for teaching and learning Roman alphabet letters, English letter-sound-word patterns, and sight or high frequency words. It includes: (1) ten short tests to determine known and unknown decoding skills, (2) a variety of teaching tools for explicit instruction of unknown decoding skills, (3) ideas for integrating spelling or encoding, and (4) ideas for developing reading fluency and comprehension.

Teaching CCRS Reading Foundational Skills was developed in collaboration with the Minnesota Literacy Council and is available at <http://online.themlc.org>. This self-paced course was created for ABE/ESL teachers, support staff, and volunteers who want to improve their understanding, testing, and teaching of the reading foundational skills. Unit 1 presents current reading research; Units 2-4 focus on alphabetic; Units 5-7 focus on fluency; and Unit 8 offers authentic case study and lesson plan examples from MN ABE reading teachers. Participants can simply browse the units, lessons, activities, and print any tests or tools OR earn 3-6 Continuing Education Units by completing the units and an assignment (described in Unit 9).
